

MICROSOFT SYSTEMS ADMINISTRATOR

POSITION SUMMARY

Cameron Ashley Building Products has an immediate opening for a Microsoft Systems Administrator, to join the Information Technology team. Headquartered in Greer, SC, our company's IT infrastructure serves 400+ users across 30+ locations nationwide. The preferred candidate would have verifiable experience in server management focusing primarily on the typical aspects of Microsoft server and Microsoft Active Directory administration.

ESSENTIAL FUNCTIONS

Responsible for managing and updating multiple Windows systems in both a physical and VM environment, active directory creation, migration and management and clustered MS SQL server deployment. Collaborate with existing staff in areas of infrastructure design, disaster recovery and future cloud technologies.

Technologies being utilized:

- VMware - vSphere
- Windows and Linux Server OS's
- EMC SAN
- Windows 7 & 10 for desktops, laptops
- Juniper communications infrastructure
- Ruckus & Ubiquiti wireless infrastructure
- Microsoft Office 365
- AWS Cloud services (EC2, S3)
- VOIP telephony using Vertical products.
- Citrix/RDS DaaS
- Zerto for DRaaS

Functions:

- Active Directory administration and troubleshooting
- Management of OS release maintenance activities
- MS Exchange migration from on premises to Office365
- Architecture, deployment, and support of Office 365 projects
- Design and architecture of cloud-based solutions
- Desktop/Laptop image creation and customization
- Level II support and guidance for helpdesk support staff.

Desired Skill Sets:

- Experience incorporating Office 365-related products (Teams, Visio, Office, Project, Exchange, Skype for Business, Yammer, Dynamics, OneDrive, etc.)
- Must have strong general Microsoft stack systems engineering skills (Windows Server, PowerShell, SQL Server, IIS, Active Directory, Windows Script Host / WSH, etc.)
- Additional skills of interest include understanding of network authentication protocols (Kerberos, virtualization (VMware), Single Sign-On / SSO, any .NET exposure, SQL Server.
- Must be able to own projects and be comfortable learning new skills.
- Microsoft certifications related to SharePoint and / or Office 365 are always a plus and should be highlighted within your resume.

QUALIFICATIONS / REQUIREMENTS

- 4+ years of related Microsoft Windows Server administration experience.
- Microsoft Certifications appropriate to the desired skill sets.
- Experience and mastery knowledge in the administration of Windows Server Operating Systems including Active Directory, Group Policy Objects, Certificate Authority, SQL, DHCP, and DNS.
- Effective teamwork, verbal, written and interpersonal communication skills
